MUTE Ceilings

The right choice!

Has it ever happened to you...

Want to relax a bit, go out to dinner and find that the restaurant you chose is too noisy to fully enjoy your meal?

How often can't you hear your own thought in the office where you work?

We all want to be in places where the noise doesn't get in between our conversation with our friends, colleagues and family.

As much effort we put into this, sometimes it's just not possible to achieve it.

Noise is one of the main stress factors and our main concern is regarding this particular problem.

We have the solution...

Our Mute Ceilings make all the difference!

With the main goal of absorbing sound, our ceilings will transform the space you're in, much more comfortable.

Communication becomes clearer and by consequence, more understandable.

After we install it, you'll quickly notice the significant reduction in reverberation time, avoiding the so called "cocktail effect" - that feeling that everyone has to speak louder so everyone can understand each other.

Mute Acoustic Ceilings..

Should be your choice because it's flexible and can be either glued or screwed into an existing ceiling or even into an steel skeleton.

We have a wide range of colors and textures that allows you to customize it according to your liking.

Our product is 100% ecological and eco-friendly.

It doesn't matter the size or the place you want to see the improvement in acoustics, our acoustic ceilings are versatile and easily installed in any scenario.

BENEFITS

Quick Application

Our product requires much less procedures than our competition.

This saves both ours time and yours also.

And time is precious!

Excelent Acoustics

Mute Ceilings have obtained a rating of 0.95 which makes them Class A regarding the absorption.

It is the most effective acoustic control.

Flexible Design

Our product can be installed on all surfaces and in the desired color.

We have 3 different textures to the various decorative options.

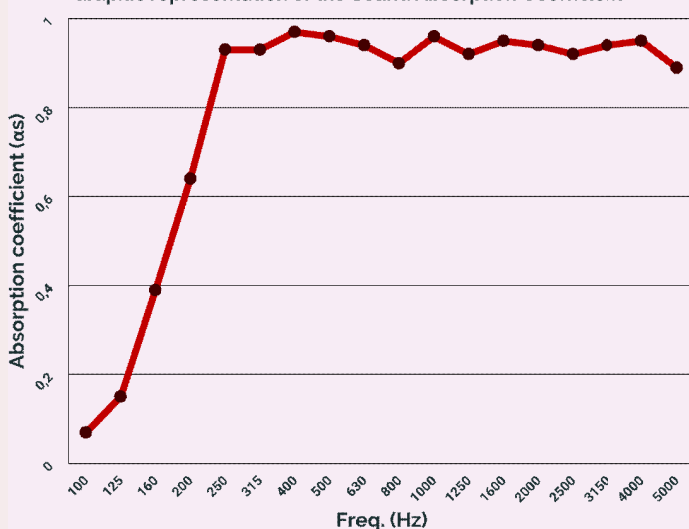

Unbeatable Price

Mute ceilings are extremely economic and therefore have an excellent cost / benefit.

Just one more reason to choose it.

ABSORPTION COEFFICIENT

TEXTURES

A very elegant surface, both in structure and color: a pure white. We call it the Scandinavian design.

A rustic look, most suitable for higher ceilings. Or if you just want a more old-fashioned visual expression.

This surface is smooth and silky, the smoothest in the world! Here the energy and appearance are more important than the price.

* You can choose to install MUTE with airbox option
